Summary

Full-Stack & DevOps Engineer (entry-level) and final-year B.Tech CSE student who owns projects end to end: the React frontend, the API behind it, and the pipeline that ships it. Built and run a Cloudflare Workers platform used by 300+ members of GFG Campus Body RKGIT, with token-based access control, scheduled jobs, and Firestore security rules. Hands-on with FastAPI, PostgreSQL, Supabase, Docker, and GitHub Actions CI/CD, and a national-level hackathon winner among 100+ teams.

Education

Raj Kumar Goel Institute of Technology

Oct 2023 – Jul 2027

Bachelor of Technology in Computer Science Engineering — CGPA: 7.7/10

Ghaziabad

Projects

GFG RKGIT Platform – Club Platform on Cloudflare Workers | 🌐 gfg.rkgit.in

2026 – Present

- Built and run the platform used by 300+ members of GFG Campus Body RKGIT: a public site, an admin portal, and a team portal in React, all served by one Cloudflare Workers REST API.
- Secured every request at the API: the Worker verifies Firebase ID tokens and the user's role before touching Firestore, caches signing keys and enforces rate limits in Cloudflare KV, and Firestore security rules (with emulator tests) act as a second layer.
- Automated upkeep with scheduled Workers (a daily job revokes temporary event-scanner access, a yearly job archives graduates) and stored event photos in Cloudflare R2.

Nivaran – Civic Issue Reporting Web App

Apr 2026

- Built a React web app where citizens report civic issues (potholes, garbage, broken streetlights) with a photo and GPS location, backed by Supabase PostgreSQL.
- Moved the core logic into the database: PostgreSQL triggers rank each report by community votes, and the reporter and affected citizens vote to verify that a fix is real.
- Wrote a Supabase Edge Function that sends push notifications through Firebase Cloud Messaging whenever a report's status changes.

Technical Skills

Languages: JavaScript, Python, SQL, HTML, CSS

Frontend & Backend: React, Next.js, FastAPI, REST APIs, Firebase (Auth, Firestore, Cloud Messaging), Supabase, PostgreSQL

DevOps & Cloud: Git, Docker, CI/CD, Linux

Developer Tools: lazygit, Claude Code, VS Code

Relevant Coursework: Operating Systems, Computer Networks, Data Structures & Algorithms, Database Management Systems

Achievement / Leadership

- Vice President, GFG Campus Body RKGIT: lead technical initiatives and workshops, and build and run the club's platform for 300+ members.
- Won 1st Position at Techtrix '25, a National-Level Hackathon organized by ITS Engineering College, among 100+ participating teams.
- Secured 2nd Position at Binary Hacks 3.0 Hackathon and 3rd Prize (with cash award) at SRIJAN 2025, the ECE RKGIT project exhibition.

Certifications

- **LFS162: Introduction to DevOps and Site Reliability Engineering** – The Linux Foundation
- **Linux Unhatched** – Cisco
